

WiQo SMOOTHING FLUID

PRODUCT SHEET

INDICATIONS FOR USE

A glycolic acid-based fluid that acts on the skin with an intense stimulating effect and promotes a rapid turnover of the superficial layer of the skin.

Thanks to its formulation, it energizes the skin by acidifying it: by lowering its pH, it triggers the skin's biochemical mechanisms to restore its physiological balance. Suitable for use even in summer.

ACTIONS

- / Improves skin tone and smoothness
- / Visibly smooths wrinkles
- / Refines uneven texture
- / Deeply hydrates

KEY ACTIVE INGREDIENTS

- / Glycolic acid
